

Customer Frequently Asked Questions

General Questions

What does Serene Mining & Maintenance Services do?

Serene Mining & Maintenance Services provides mining maintenance, mobile equipment servicing, field repairs, breakdown support, process plant maintenance, and infrastructure installation services for mining and industrial operations throughout Australia.

Where is Serene Mining & Maintenance Services located?

Our office is located in Sinagra, Western Australia. We provide support services to mining and industrial operations across Australia.

What industries do you serve?

- Mining operations
- Processing plants
- Material handling facilities
- Heavy industrial operations
- Infrastructure projects

Are you an Australian-owned company?

Yes. Serene Mining & Maintenance Services is an Australian-operated company providing professional mining maintenance and infrastructure services.

Mobile Servicing & Field Support

Do you offer on-site repairs?

Yes. Our mobile service teams are fully equipped to travel to your site and perform repairs, inspections, maintenance, and troubleshooting directly in the field.

Can you attend breakdowns?

Yes. We provide breakdown support and emergency repair services to minimize downtime and restore equipment operation as quickly as possible.

How quickly can a technician attend site?

Response times depend on location, technician availability, and project requirements.

Do your technicians bring their own tools?

Yes. Our fitters and technicians are fully equipped with professional tools, equipment, and service vehicles required for field work.

Do you provide preventative maintenance?

Yes. We offer preventative maintenance programs designed to identify issues before they become major failures.

Process Plant Maintenance

Equipment maintained includes crushers, screens, conveyors, feeders, chutes, wear plates, material handling systems and mechanical components.

Crusher Maintenance

We perform inspections, repairs, rebuilds, shutdown maintenance and component replacements.

Cone Crusher Rebuilds

We provide cone crusher rebuilds, relining services, maintenance and repairs.

Infrastructure Installation

We provide structural installations, equipment installations, conveyor installations, mining infrastructure projects and site upgrades.

Safety & Compliance

Safety is at the core of every project. We follow industry best practices and client requirements.

Quotes & Pricing

Quotes can be requested through our website, by phone or by email. Initial quotations are provided without obligation.

Service Availability

We support remote mine sites, long-term maintenance contracts, and both small and large projects.
